Professional Summary

Computer Science undergraduate with strong programming fundamentals and hands-on experience in Full-Stack Web Development. Looking for opportunities to contribute to real-world software projects while continuously growing as a Full-Stack Developer.

EDUCATION

- 2023 - 2027 Bachelor of Technology in Computer Science, Srinivasa Ramanujan Institute of Technology, Anantapur (CGPA: 8.46)
- 2023 Class XII Board of Intermediate Education (86%)
- 2021 Secondary School Education (95.8%)

SKILLS

Programming Languages: Java

Frontend Development: HTML5, CSS3

Databases: MySQL

Tools: VS Code, Postman, Git, GitHub

Concepts: REST APIs, JWT Authentication, OOP Concepts, Basic Data Structures and Algorithms

PROJECTS

InnerBloomFriend: Student Mental Health Platform

Tech Stack: React.js, Node.js, Express.js, supabase

- Developed a student mental health platform for analyzing student stress level and suggest the remedy and exercises for stress relief.
- Integrated **OpenAI API** key for the real time chat with ai and seeking the suggestions from ai and chatting assistant.
- Built secure and scalable backend services with JWT authentication, protected routes, and efficient data handling supporting **1,000+ messages** and user interactions.

Portfolio

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a personal portfolio website to showcase **2+ projects**, technical skills, and development experience.
- Structured the website with clear sections for projects, skills, experience, and contact information.
- Included project details with **GitHub and live demo links**, enabling visitors to connect easily.

Locate-X:Finding Missing person platform

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a **full-stack AI missing-persons platform** with real-time Socket.IO notifications, role-based admin/user portals, and MongoDB Atlas persistence.
- Integrated **Google Gemini AI vision API** to automate biometric face-match scoring with an **80%+**
- Confidence threshold pipeline triggering instant reporter alerts.
- Engineered a secure cloud image pipeline using Cloudinary + Multer, reducing API payload by **60–80%** via optimized CDN delivery.

ACHIEVEMENTS

- Participated in 3+ Hackathons and won the Consolation prizes.
- Solved 200+ leetcode coding problems.
