Tools:VS Code, Postman, Git, GitHub

Concepts: REST APIs, JWT Authentication, OOP Concepts, Data Structures and Algorithms,Operating Systems, Computer Networks, AI prompting.

Projects

InnerBloomFriend: Student Mental Health Platform

[GitHub](#) | [Demo](#)

Tech Stack: React.js, Node.js, Express.js, supabase.

- Developed a student mental health platform for analyzing student stress level and suggest the remedy and exercises for stress relief.
- Integrated **OpenAI API** key for the real time chat with ai and seeking the suggestions from ai and chatting assistant.
- Built secure and scalable backend services with JWT authentication, protected routes, and efficient data handling supporting **1,000+ messages** and user interactions.

Portfolio

[GitHub](#) | [Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a personal portfolio website to showcase 2+ projects, technical skills, and development experience.
- Structured the website with clear sections for projects, skills, experience, and contact information.
- Included project details with GitHub and live demo links, enabling visitors to connect easily.

Locate-X:Finding Missing person platform

[GitHub](#) | [Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built an **AI-powered** full-stack missing-persons platform with real-time alerts, role-based access, and MongoDB Atlas.
- Integrated **Google Gemini Vision API** for automated face matching with **80%+ confidence** and instant notifications.
- Optimized image uploads using Cloudinary and Multer, reducing API payloads by **60–80%**.

Achievements

- Participated in 3+ Hackathons and won the Consolation prizes.
- Solved 200+ leetcode problems.
